1. Scope

This reference specification applies to LQM21FN_00 series, Chip coil (Chip Inductors).

2. Part Numbering

(ex)       L Q  M  2 1         F             N       1 R 0        N        0          0         D

Product ID Structure Dimension Applications Category Inductance Tolerance Features Electrode Packaging

D: Taping
L: Taping
* B: Bulk packing also available

3. Rating

- Operating Temperature Range  -40°C to +85°C
- Storage Temperature Range  -55°C to +125°C

<td>8mm-wide Plastic tape</td>
<td></td>
</tr>
</tbody>
</table>

*Dimension of the Cavity is measured at the bottom side.*

9.2 Specification of Taping

(1) Packing quantity (standard quantity)

- Inductance : 1.0 μH to 2.2 μH (Paper tape) 4,000 pcs / reel
- Inductance : 4.7 μH to 47 μH (Plastic tape) 3,000 pcs / reel

(2) Packing Method

(Paper tape)

Products shall be packed in the cavity of the base tape continuously and sealed by top tape and bottom tape.

(Plastic tape)

Products shall be packed in the each embossed cavity of plastic tape and sealed by cover tape.

(3) Sprocket hole

The sprocket holes are to the right as the tape is pulled toward the user.

(4) Spliced point

(Paper tape)

Base tape and Top tape has no spliced point.

(Plastic tape)

Plastic tape and Cover tape has no spliced point.

(5) Missing components number

Missing components number within 0.1% of the number per reel or 1 pc., whichever is greater, and are not continuous. The Specified quantity per reel is kept.

9.3 Pull Strength

<table>
<thead>
<tr>

165 to 180 degree

Cover tape

Plastic tape

9.5 Dimensions of Leader-tape, Trailer and Reel

There shall be leader-tape (top tape / cover tape and empty tape) and trailer-tape (empty tape) as follows.

9.6 Marking for reel

Customer part number, MURATA part number, Inspection number (+1), RoHS Marking (+2), Quantity etc.

*1) <Expression of Inspection No.>

(1) Factory Code
(2) Date
   First digit : Year / Last digit of year
   Second digit : Month / Jan. to Sep. → 1 to 9, Oct. to Dec. → O, N, D
   Third, Fourth digit : Day
(3) Serial No.

*2) <Expression of RoHS Marking >

ROHS – Y (△)
(1) RoHS regulation conformity parts.
(2) MURATA classification number

9.7 Marking for Outside package (corrugated paper box)

Customer name, Purchasing order number, Customer part number, MURATA part number, RoHS Marking (+2), Quantity, etc.

9.8. Specification of Outer Case

<table>
<thead>
<tr>
<th>Outer Case Dimensions (mm)</th>
<th>Standard Reel Quantity in Outer Case (Reel)</th>
</tr>
</thead>
<tbody>
<tr>
<td>W</td>
<td>D</td>
</tr>
</tbody>
</table>

* Above Outer Case size is typical. It depends on a quantity of an order.
10. **Caution**

**Limitation of Applications**

Please contact us before using our products for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property.

1. Aircraft equipment
2. Aerospace equipment
3. Undersea equipment
4. Power plant control equipment
5. Medical equipment
6. Transportation equipment (vehicles, trains, ships, etc.)
7. Traffic signal equipment
8. Disaster prevention / crime prevention equipment
9. Data-processing equipment
10. Applications of similar complexity and /or reliability requirements to the applications listed in the above

11. **Notice**

This product is designed for solder mounting. Please consult us in advance for applying other mounting method such as conductive adhesive.

11.1 **Land pattern designing**

11.2 **Flux, Solder**

- Use rosin-based flux.
- Don't use highly acidic flux with halide content exceeding 0.2(wt)% (chlorine conversion value).
- Don't use water-soluble flux.
- Use Sn-3.0Ag-0.5Cu solder.
- Standard thickness of solder paste: 100µm to 150µm.

11.3 **Flow soldering / Reflow soldering conditions**

- Pre-heating should be in such a way that the temperature difference between solder and product surface is limited to 150°C max. Cooling into solvent after soldering also should be in such a way that the temperature difference is limited to 100°C max.
- Insufficient pre-heating may cause cracks on the product, resulting in the deterioration of products quality.
- Standard soldering profile and the limit soldering profile is as follows.
  - The excessive limit soldering conditions may cause leaching of the electrode and/or resulting in the deterioration of product quality.

Soldering profile

<table>
<thead>
<tr>

</tbody>
</table>

11.4 Reworking with soldering iron.
The following conditions must be strictly followed when using a soldering iron.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-heating</td>
<td>150°C, 1 min</td>
</tr>
<tr>
<td>Tip temperature</td>
<td>350°C max.</td>
</tr>
<tr>
<td>Soldering iron output</td>
<td>80W max.</td>
</tr>
<tr>
<td>Tip diameter</td>
<td>φ 3mm max.</td>
</tr>
<tr>
<td>Soldering time</td>
<td>3(+1, -0)s</td>
</tr>
<tr>
<td>Time</td>
<td>2 times</td>
</tr>
</tbody>
</table>

Note: Do not directly touch the products with the tip of the soldering iron in order to prevent the crack on the products due to the thermal shock.

11.5 Solder Volume

- Solder shall be used not to be exceeded the upper limits as shown below.
- Accordingly increasing the solder volume, the mechanical stress to Chip is also increased. Exceeding solder volume may cause the failure of mechanical or electrical performance.

\[ \frac{1}{3}T \leq t \leq T \]

T : thickness of product

11.6 Product's location

The following shall be considered when designing and laying out P.C.B.’s.

(1) P.C.B. shall be designed so that products are not subject to the mechanical stress due to warping the board.

Poor example

Good example

Products shall be located in the sideways direction (Length: a < b) to the mechanical stress.
(2) Components location on P.C.B. separation.

It is effective to implement the following measures, to reduce stress in separating the board.

It is best to implement all of the following three measures; however, implement as many measures as possible to reduce stress.

<table>
<thead>
<tr>
<th>Contents of Measures</th>
<th>Stress Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Turn the mounting direction of the component parallel to the board separation</td>
<td>A &gt; D *1</td>
</tr>
<tr>
<td>surface.</td>
<td></td>
</tr>
<tr>
<td>(2) Add slits in the board separation part.</td>
<td>A &gt; B</td>
</tr>
<tr>
<td>(3) Keep the mounting position of the component away from the board separation</td>
<td>A &gt; C</td>
</tr>
<tr>
<td>surface.</td>
<td></td>
</tr>
</tbody>
</table>

*1 A > D is valid when stress is added vertically to the perforation as with Hand Separation. If a Cutting Disc is used, stress will be diagonal to the PCB, therefore A > D is invalid.

(3) Mounting Components Near Screw Holes

When a component is mounted near a screw hole, it may be affected by the board deflection that occurs during the tightening of the screw. Mount the component in a position as far away from the screw holes as possible.

11.7 Cleaning Conditions

Products shall be cleaned on the following conditions.

(1) Cleaning temperature shall be limited to 60°C max. (40°C max for IPA.)
(2) Ultrasonic cleaning shall comply with the following conditions with avoiding the resonance phenomenon at the mounted products and P.C.B.

   Power : 20 W / l max.    Frequency : 28kHz to 40kHz    Time : 5 min max.

(3) Cleaner
   1. Alcohol type cleaner
      Isopropyl alcohol (IPA)
   2. Aqueous agent
      PINE ALPHA ST-100S

(4) There shall be no residual flux and residual cleaner after cleaning. In the case of using aqueous agent, products shall be dried completely after rinse with de-ionized water in order to remove the cleaner.
(5) Other cleaning   Please contact us.

11.8 Resin coating

The inductance value may change and/or it may affect on the product's performance due to high cure-stress of resin to be used for coating/molding products. So please pay your careful attention when you select resin.

In prior to use, please make the reliability evaluation with the product mounted in your application set.

MURATA MFG.CO., LTD
11.9 Caution for use
There is possibility that the inductance value change due to magnetism. Don't use a magnet or a pair of tweezers with magnetism when chip coil are handled. (The tip of the tweezers should be molded with resin or pottery.)

11.10 Magnetic Saturation
When the excessive current over rated current is applied, the inductance value may change due to magnetism.

11.11 Handling of a substrate
After mounting products on a substrate, do not apply any stress to the product caused by bending or twisting to the substrate when cropping the substrate, inserting and removing a connector from the substrate or tightening screw to the substrate.
Excessive mechanical stress may cause cracking in the product.

Bending  Twisting

11.12 Storage and Handling Requirements
(1) Storage period
Use the products within 6 months after delivered.
Solderability should be checked if this period is exceeded.

(2) Storage conditions
- Products should be stored in the warehouse on the following conditions.
  Temperature: -10°C to 40°C
  Humidity: 15% to 85% relative humidity  No rapid change on temperature and humidity
Don’t keep products in corrosive gases such as sulfur, chlorine gas or acid, or it may cause oxidization of electrode, resulting in poor solderability.
- Products should be stored on the palette for the prevention of the influence from humidity, dust and so on.
- Products should be stored in the warehouse without heat shock, vibration, direct sunlight and so on.
- Products should be stored under the airtight packaged condition.

(3) Handling Condition
Care should be taken when transporting or handling product to avoid excessive vibration or mechanical shock.

12. ! Note
(1) Please make sure that your product has been evaluated in view of your specifications with our product being mounted to your product.
(2) You are requested not to use our product deviating from the reference specifications.
(3) The contents of this reference specification are subject to change without advance notice.
Please approve our product specifications or transact the approval sheet for product specifications before ordering.

MURATA MFG.CO., LTD
